SUMMARY

I am a BSc in Computer Science and Engineering graduate with a proven track record of solving complex technical challenges through analytical thinking and innovative solutions. My problem-solving approach combines deep technical expertise in C, C++, Java, and web technologies with a methodical debugging and optimization mindset. As a WordPress Developer, I excel at identifying performance bottlenecks, resolving compatibility issues, and architecting scalable solutions that address client needs effectively.

EXPERIENCE

Business Growth Associate — 04/2024 - Present

E-GUIDER GLOBAL (Contract, Remote)

- Contractual remote role focused on business growth and client acquisition.
- Strategic planning and technical implementation for expansion.

WordPress Developer — 05/2021 - 01/2024

Softvence Agency

- Digital agency specializing in web development and design solutions.
- Optimized application efficiency by 30% through code optimization.

PROJECTS

IoT-Based Air Quality Monitor — 2024

Real-time data collection and automated alerts for hazardous conditions in industrial areas.

Train Ticket Booking App — 2023

Android application featuring secure payment processing and real-time schedule updates.

EDUCATION

BSc in CSE — 03/2021 - 04/2025

Daffodil International University

Relevant coursework: Data Structures, Algorithms, Software Engineering.

KEY ACHIEVEMENTS

- Developed web platforms increasing user engagement by 50%.
- Led IoT project reducing monitoring costs by 20%.
- Achieved 95% accuracy in student records management system.
- Optimized code resulting in 30% efficiency gain.

SKILLS

C/C++ | Java | WordPress | HTML/CSS | JavaScript | OOP | AI Tools

LANGUAGES

Bengali	**Native**
English	**Fluent**
